

THE PAST

where we started ...

- High Costs To Heat And Cool Houses
- Carbon Emissions And Climate Change
- Dependence On Fossil Fuels

THE FUTURE

where we are going ...

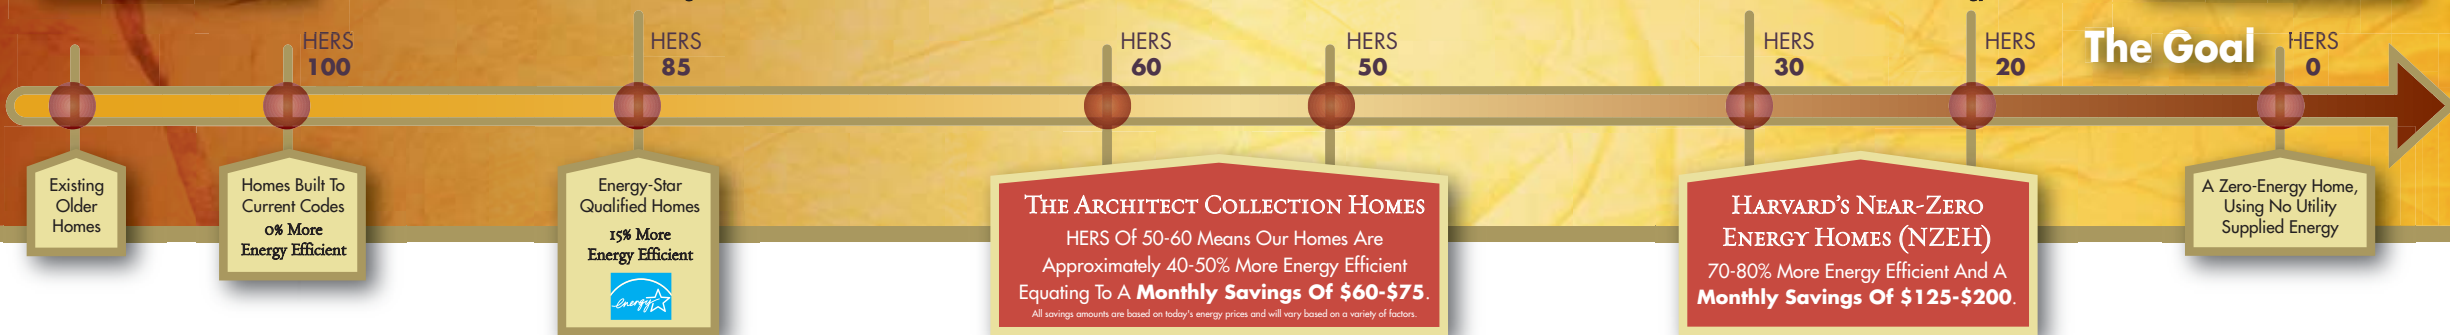

- Lower Utility Bills
- Less Pollution
- A Reduced Dependence On Fossil Sources Of Energy

HOME ENERGY RATING SCORE (HERS)

This Is Good,
But Not Good Enough For Us!

We Are Achieving This Performance
NOW With Our Near-Zero Energy Homes!

The Goal

THE ARCHITECT COLLECTION HOMES
HERS Of 50-60 Means Our Homes Are
Approximately 40-50% More Energy Efficient
Equating To A **Monthly Savings Of \$60-\$75.**
All savings amounts are based on today's energy prices and will vary based on a variety of factors.

HARVARD'S NEAR-ZERO ENERGY HOMES (NZEH)
70-80% More Energy Efficient And A
Monthly Savings Of \$125-\$200.
